

WENDIT GROUP

THE TECHNOLOGY & SERVICE COMPANY

MINING

ONE STOP SHOP
Service is our strength

Mining and road construction

Carrier and cement

Wear and spare parts

Arguments in favour of working with WENDIT GROUP as a general contractor or outsourcing partner

1 WENDIT as general contractor

As a general contractor, the WENDIT GROUP offers a complete package that realises public and industrial projects from concept, project planning, project coordination and infrastructure in a resource-saving way. Based on the experience already gained in many public projects with the coordination of all trades, we are the competent and reliable partner for small and large projects in all areas of public life.

2 WENDIT as an outsourcing partner

Our services ensure an efficient, innovative workflow from project planning to turnkey project handover. As an outsourcing partner in mining, for earthworks in infrastructure projects and as a construction machinery service partner, we usually work with local construction companies and craftsmen, or by arrangement, with partners from our competence network. We take over the complete workflow for partial trades on a turnkey basis.

3 WENDIT as a machine service partner

Thanks to our global network, we organise, deliver and install original spare parts for mining and construction machines of all brands or, if not possible in a hurry, adequate replacements. Our trained service staff are quickly on site for all work. For complex service work, we also organise the provision of service teams from our partners.

As a special service, we offer the regeneration of batteries and the treatment of hydraulic and engine oil with special units on site. This effectively saves time, costs for stockpiling and valuable working time.

4 Advice and knowledge transfer

Thanks to our comprehensive know-how in project planning, project handling and machine service, we advise our customers professionally, competently and purposefully in the run-up to an order in order to achieve maximum plant availability and service.

5 Location, needs and feasibility analysis

Due to our many years of experience in engineering and in the realisation of municipal and industrial projects, as well as our locations in Africa with local specialist personnel, we are able to analyse projects of any size in advance on site in order to find the best solution.

6 Project planning and technical planning

Are you planning a road construction or civil engineering project, or the modernisation of existing infrastructure with associated earthworks? Then you should talk to us. We plan and realise your requirements from engineering, production of mechanical components and specialist personnel on site, individually tailored to your project.

7 Construction site and machine service

As an established outsourcing partner, we offer our customers a complete all-round service from the professional set-up of the construction site with all the associated safety equipment, state-of-the-art machinery and the stocking and procurement of original wear and spare parts.

8 Human resources management

Depending on the project requirements, we work with our own specialist staff or with local construction companies and craftsmen under our expert management. Our services and the smooth cooperation with all parties involved in the project ensure an efficient, innovative workflow from consultation to project handover.

9 Project construction management and quality management

The project and construction management is carried out by us or under our direction in the sense of our clients with the greatest possible protection of the existing infrastructure. As coordinators, our project managers are regularly on site and ensure regulated work processes, adherence to deadlines as well as compliance with occupational health and safety regulations and the quality of all trades.

10 Service and maintenance

Whether machine service or project support after its completion - the service technicians of our African subsidiaries provide permanent support on site or via remote maintenance with advice and software updates.

WENDIT MINING

In the MINING business division, the WENDIT GROUP is your German/African partner for mining, road construction and civil engineering as well as a service partner for machine wear and spare parts and all necessary accessories that need to be on site quickly for continuous operation.

The WENDIT GROUP Technology & Service Company based in Regensburg / Germany, with offices in Mauritania, Guinea, Benin, Congo and Burkina Faso is the established and long-standing cooperation partner of German/European companies for industrial and municipal projects in Africa. In the MINING division, we specialise in project planning, engineering and the realisation of large and small municipal and industrial mining and road construction projects.

Our expertise has grown over the years

Whether it is an entire project or individual trades - our project solutions are oriented towards the needs of our African customers and have grown over the years. Their wishes come first. Trust, partnership and reliability form the basis of our business relationships.

WE ARE A GLOBAL TEAM PLAYER

The smooth interaction between sales, engineering, procurement management and quality-conscious project implementation is a tradition with us. Our highly qualified employees in Germany and Africa ensure that we can complete every order quickly and on schedule.

For the realisation, we rely on a well-developed, proven Europe-wide partner network with state-of-the-art construction machinery technology, specialised staff and high service quality.

You too can benefit from WENDIT MINING Solutions!

WE ARE A COMPETENCE PARTNER

for mining, road and civil engineering, infrastructure and landscaping

Thanks to our Europe-wide proven partner network with a specialised machine portfolio of the latest generation for surface mining as well as road construction and civil engineering, we are „Open for Everything“.

Our services are geared to the requirements of our African clients and are based on the flexibility to identify ourselves with large and small projects as a general contractor for complete turnkey projects or as an outsourcing service provider for sub-projects.

In doing so, adherence to deadlines, keeping to the budget, the use of the best available technologies as well as a long-term and trustworthy business relationship are the focus of maximum customer satisfaction.

WENDIT MINING AND ROAD CONSTRUCTION

In the mining and road construction business segment, we are service partners in the organisation and coordination of state-of-the-art machinery and plant equipment - from demolition and transport to storage.

Thanks to our global network, we organise, deliver and install original spare parts for all brands of construction machinery or, if not possible in a hurry, adequate replacements. Our service staff, trained in mining machinery, are quickly on site for all work. For complex service work, we also organise the provision of service teams from our partners. Our dedicated sales and technical service is there for you around the clock, taking your order and advising you on the most cost-effective solution for your company and prompt appointment.

Battery, engine oil and hydraulic service

As a special service, we offer the regeneration of batteries and the treatment of hydraulic and engine oil with special units on site. This effectively saves time, storage costs and valuable working time.

WENDIT CARRIER AND CEMENT

As a general contractor or outsourcing partner for partial trades, the WENDIT GROUP offers everything that is necessary for the resource-saving realisation of public and industrial projects. Consulting, concept, project planning and machinery equipment as well as specialised personnel for project coordination and quality control. In terms of personnel management, we generally work with local construction companies and craftsmen who are supported in word and deed by specialist personnel from our African branches.

Based on the experience already gained from many public projects in road construction, civil engineering and infrastructure with the coordination of all trades, we are the competent and reliable partner for small and large projects in the industry.

WENDIT ONE-STOP-SHOP MACHINE AND PLANT SERVICE

In addition to the provision of all construction machinery (purchase, rental or leasing) of leading brands, our services in machinery and equipment service also include their repair of malfunctions as well as preventive and technical services and training.

Do you unexpectedly need spare parts or a repair for your machine or system? Then we are always there for you! As the spare parts service is always urgent, we ensure the provision of original spare parts as well as their assembly as quickly as possible.

Our One Stop Shop service portfolio

- Technical customer service by fitters from our machine suppliers or service technicians from our African branches
- Machine maintenance, inspection and repair of new and used machines of all brands
- Worldwide procurement management of original spare parts or adequate replacements
- Generous stock of common spare and replacement parts
- Consignment stock according to customer requirements
- Battery, engine oil and hydraulics before on-site service
- Operator training by our experts
- Festo training container for live training sessions

Mobile training labs

Training wherever you need it.

The fully equipped and adaptable mobile training labs offer schools, universities, companies and governments a temporary solution to conduct holistic training for different job profiles and technologies in a cost-efficient and flexible way. Whether renting, leasing or buying, benefit from this effective training solution when it comes to education and employee training. The Festo training containers with modular software and hardware for pneumatics, hydraulics, electrics, electronics, gear technology, automation, control, multimedia and simulation enable the trainer to provide intensive training with practical exercises and tests.

The lifespan of the mobile training laboratory is no different from that of a conventional building. It is built to the same high standards and is intended for permanent use.

Your advantages

- Turnkey, cost-effective education solution fully tailored to your training needs and objectives
- Flexible configuration of hardware and software
- Wide range of technical learning systems
- Moveable with trailers
- Offers space for up to 18 people
- Trailer external presentation can be tailored to your image

WENDIT GROUP

THE TECHNOLOGY & SERVICE COMPANY

Our other business areas as a technology and service company in the cooperation of German/ European companies PRO Africa.

Our business areas are oriented towards the needs of our African clients from politics, municipalities, companies and the trades. They have grown over the years and are now oriented towards the Sustainable Development Goals of the UN Agenda 2030.

ENERGY

In the field of power generation, WENDIT offers a wide range of OFF and ON-GRID solar and solar/wind power systems for the generation of „green energy“ for grid support and self-sufficient power supply for communities, companies and infrastructure.

PUBLIC WORKS

As a general contractor, WENDIT offers a complete package that covers public projects from the concept, the project planning, project coordination and management as well as the necessary infrastructure.

HYDRAULICS

One of WENDIT's domains is equipment, components and systems for drinking and process water extraction as well as low-, medium- and high-pressure hose service for construction and mining machinery.

AGRICULTURE

For private and commercial agriculture, we procure high-quality equipment and machinery for soil cultivation, sowing and harvesting, as well as equipment for animal breeding and husbandry.
